There are many different types of plants that you can add to your betta aquarium, but some of the best choices include:

- **Java fern** (*Microsorium pteropus*): This is a hardy and easy-to-care-for plant that is perfect for beginners. Java fern can be attached to driftwood or rocks, and it will grow well in a variety of water conditions.
- **Anubias** (*Anubias barteri*): Anubias is another hardy and easy-to-care-for plant that is ideal for betta aquariums. Anubias can be attached to driftwood or rocks, and it will even grow in low-light conditions.
- **Our Book Library sword** (*Echinodorus Our Book Libraryicus*): This is a larger plant that can provide a great hiding place for your betta. Our Book Library swords need a bit more light than Java fern or Anubias, but they are still relatively easy to care for.
- **Water sprite** (*Ceratopteris thalictroides*): This is a floating plant that can help to provide shade and cover for your betta. Water sprite is very easy to care for, and it can even be grown in a vase or bowl.
- **Hornwort** (*Ceratophyllum demersum*): This is a fast-growing plant that can help to improve the water quality in your aquarium. Hornwort is very easy to care for, and it can even be grown in a vase or bowl.

When choosing plants for your betta aquarium, it is important to keep in mind the size of your aquarium and the type of betta you have. Some bettas are more aggressive than others, and they may need more hiding places. It is also important to choose plants that are compatible with the water conditions in your aquarium. If you are unsure about which plants to choose, you can always consult with your local fish store.

In addition to the plants listed above, there are many other great plants that you can add to your betta aquarium. Some other popular choices include:

- Cryptocoryne
- Ludwigia
- Rotala
- Hygrophila
- Cabomba

With so many great plants to choose from, you are sure to find the perfect ones to add to your betta aquarium. Just be sure to do your research and choose plants that are compatible with your betta's needs.

Benefits of live plants for betta fish

There are many benefits to adding live plants to your betta aquarium, including:

- **Plants provide hiding places and resting spots for your betta.** This is especially important for bettas that are more aggressive or shy.
- **Plants help to improve the water quality in your aquarium.** Plants absorb nitrates and other pollutants from the water, which can help to keep your betta healthy.
- **Plants provide a more natural and stimulating environment for your betta.** Bettas are native to Southeast Asia, where they live in slow-moving rivers and streams. Adding live plants to your aquarium can help to recreate this natural environment.

If you are looking for a way to improve the life of your betta fish, adding live plants to your aquarium is a great option. Plants are relatively inexpensive,

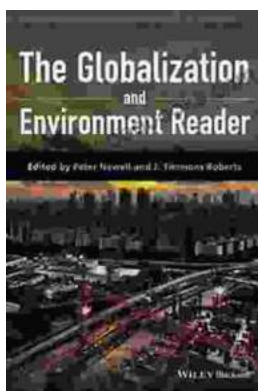

easy to care for, and they can provide your betta with many benefits.
