- **Lungs:** definitive diagnosis is the finding of non-caseating granulomas in lymph node biopsy.

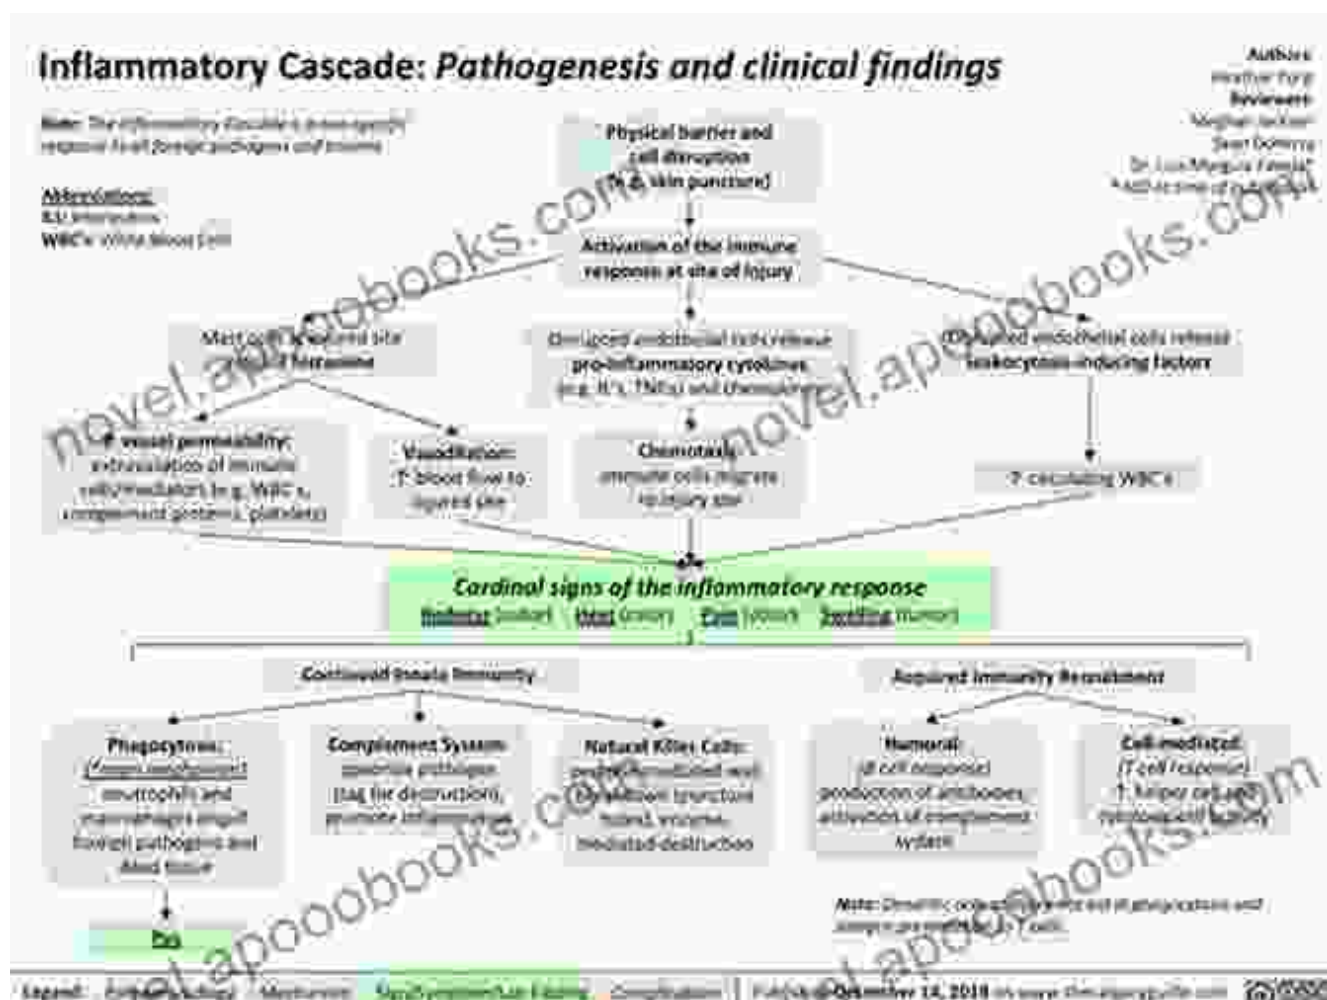

- **Liver/Kidney:** monitor alkaline phosphatase, creatinine, calcium, 25- and 1,25-OH vitamin D (Crouser et al 2020).

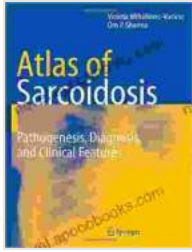

Thorough Examination of Clinical Manifestations

The Atlas of Sarcoidosis meticulously examines the diverse clinical manifestations of this disease, encompassing both pulmonary and extrapulmonary involvement. It explores the respiratory, cutaneous, musculoskeletal, ocular, and neurological presentations of sarcoidosis,
